

FiberOptic.com Certifications

FiberOptic.com offers certification courses for individuals interested in the fiber optic installation field. These comprehensive courses offer practical knowledge and teach the latest techniques. The FOT-CFI and FOT-OSPI courses also offer an optional ETA certification upon completion of the course and passing of the ETA examination.

FOT-FOF	<i>Fiber Optic Fundamentals</i>	2 Days	\$600
Includes: Fiber Optic Theory, Cable Selection/Preparation, Connectorization/Termination, Enclosures/Cable Management and Optical Loss Testing.			
FOT-CFI	<i>Certified Fiber Installer</i>	4 Days	\$1,350
Includes the above and: Basic Network Design, Fusion Splicing and OTDR Testing. ETA Certification Available!*			
FOT-OSPI	<i>Outside Plant Installer</i>	4 Days	\$1,350
Includes: Fiber Optic Theory, OTDR and Optical Loss Testing, Cable Preparation, Splicing, and FTTX, Emphasizing Single Mode Fiber Installation. ETA Certification Available!*			

FiberOptic.com Master Certifications

FiberOptic.com Masters Program is the first of its kind in the telecommunications field. FiberOptic.com's Masters Program is designed to provide an unmatched, real-life field experience with solid classroom instruction. Using various labs designed around specific interests, the Masters is a perfect compliment for experienced workers and previous Fiber certified members.

FOT-MFS	<i>Master in Splicing</i>	2 Days	\$1,350
Advanced Network Design and Advanced Fusion Splicing (Labs)			
FOT-MFT	<i>Master in Testing</i>	2 Days	\$1,350
Emergency Restoration, Advanced Optical Loss Testing, Advanced OTDR Testing, Reporting and Fiber Characterization (Labs)			
FOT-MFOT	<i>Master Technician</i>	5 Days	\$3,525
Includes above and: FiberOptic.com Master Fiber Optic Technician Certification.			

BICSI Information Transport Systems (ITS) Training

BICSI's goal is to produce highly competitive installers in a minimal amount of time and at a reasonable cost. Highlights of the program include core skills training, registration examinations and structured on-the-job training.

Completion of the training program provides participants with the skills to conduct site surveys, pull wire/cable and test and terminate copper and fiber cable to the highest level of specification.

IN100	<i>ITS Installer 1</i>	5 Days	\$1,395*
ITS Installer 1 is for anyone wishing to pursue a career in ITS cabling distribution. ITS Installer 1 training is design for individuals with little or no cabling installation experience.			
IN200	<i>ITS Installer 2</i>	5 Days	\$1,395*
ITS Installer 2 is for anyone wishing to expand their knowledge of the industry, learn new skills and continue to advance professionally.			
TE300	<i>ITS Technician</i>	5 Days	\$1,395*
ITS Technician is for highly experienced ITS cabling installers.			
* BICSI pricing does not include costs for manuals or exam and application fees. (+ \$200 for application fee and \$95 for the manual)			

FiberOptic.com Premise Wiring Systems Certifications

FiberOptic.com's Premise Wiring Systems Courses offer a wide range of copper and fiber knowledge with hands on training relative to theory, codes, standards, and practices accepted in the Telecommunications Industry today. These courses are for new or experienced personnel involved with structured cabling, facilities management, and technical services who are especially responsible for moves, additions and changes of copper and fiber premise wiring systems.

PWT-PWSF	<i>Premise Wiring Systems Fundamentals</i>	2 Days	\$600
Includes: Telecommunication Standards; Topologies; Cable Specifications; Cable Applications; Installation Practices; Testing and Equipment; Specification Process.			
PWT-PWSI	<i>Premise Wiring Systems Installer</i>	3 Days	\$950
Includes fundamentals with hands-on lab entailing copper and fiber termination, cable preparation, installation practices and certification testing procedures.			
PWT-PWST	<i>Premise Wiring Systems Technician</i>	4 Days	\$1,350
Advanced copper and fiber optic theory, codes, standards and practices with hands-on labs including copper and fiber terminations, installation practices, grounding and bonding overviews and copper and fiber testing. One year electrical or telecommunications voice/data experience is recommended.			

** For an additional \$150, students may choose to receive an ETA Certification upon successful completion of the course and ETA exam.
